Enable Events (1) ☒

Your app can subscribe to be notified of events in Slack (for example, when a user adds a reaction or creates a file) at a URL you choose. [Learn more.](#)

Request URL

We'll send HTTP POST requests to this URL when events occur. As soon as you enter a URL, we'll send a request with a `challenge` parameter, and your endpoint must respond with the challenge value. [Learn more.](#)

Subscribe to bot events

Apps can subscribe to receive events the bot user has access to (like new messages in a channel). If you add an event here, we'll add the necessary [OAuth scope](#) for you.

Event Name	Description	Required Scope
app_mention	Subscribe to only the message events that mention your app or bot	app_mentions:read

(2) **Add Bot User Event**

Discard Changes **Save Changes**

11. 因進行Events以及URL更新，點擊Install App，點擊Reinstall App

常见问题：若您先前已使用同样的token添加在平台上，因故移除欲再次添加时，或找不到聊天室清单，建议您重新产生一组token后再进行添加。步骤如下：

1. 点选OAuth & Permissions，往下拉到Revoke All OAuth Tokens,选择Revoke并确认
 2. 同样在OAuth & Permissions，往上點擊Reinstall App
 3. 此时Bot User OAuth Access Token已更新，可重新使用于平台
- (注意：若重新产生一组token，已成功添加于平台的通讯帐号记录将会受到影响，必需重新新增)
